

PANIMALAR ENGINEERING COLLEGE

(An autonomous Institution)

PLACEMENT TRAINING CENTER

Students' testimonial on placement training

My communication trainer has been instrumental in improving my grammar and communication skills. Over the weeks, we have covered various topics, including:

- **Group Discussions & Role Plays:** These activities helped build confidence, develop communication skills, and better prepare us for real-world interactions.
- **Interview Preparation:** Mr. Acharya guided us through key interview skills, such as framing answers, creating resumes, and facing interview panels. These sessions have been crucial in preparing us for placement opportunities.
- **Verbal Ability Tests:** We received guidance on how to handle verbal ability tests for companies like Accenture, which boosted our confidence for interviews.

Technical Training :

- **Core Concepts:** We explored object-oriented programming principles such as encapsulation, inheritance, polymorphism, and abstraction. Mr. Akshay often repeated difficult concepts, ensuring we fully grasped them.
- **Advanced Topics:** In later weeks, we delved into String classes, exception handling, lambda expressions, file handling, wrapper classes, multithreading, and collections (ArrayList, LinkedList, HashSet). These lessons have been strengthening our Java knowledge.
- **Assignments & Programs:** Regular assignments and practical programs were given to solidify our understanding. Mr. Akshay patiently solved these with us the following day, ensuring we could solve similar problems independently.
- **Interview Questions:** Trainer provided us with common programming questions asked during interviews, which helped in our preparation for job placements.

The Java classes, combined with regular presentations, have helped me overcome stage fear and improved my ability to explain concepts clearly, which is essential for both interviews and group work.

Aptitude and SQL Classes:

In addition to communication and Java, we attended aptitude and SQL classes, which were equally valuable:

- **Aptitude:** Topics such as discounts, family relationships, simple and compound interest, profit and loss, coding-decoding, time and work, seating arrangement, and number series were covered. Shortcuts and logical approaches were taught to solve complex problems more efficiently.
- **SQL:** We learned SQL queries including DDL, DML, DQL, TCL, group by, having clause, and types of operators. Daily assignments in SQL allowed us to practise and improve our query-solving skills using SQLite.

Summary :

I am extremely grateful to the trainers and the management of **Panimalar Engineering College** for organising these highly beneficial training sessions. The comprehensive teaching methods and hands-on assignments have significantly improved my technical and communication skills. I look forward to using these opportunities to the fullest, aiming to improve further and secure a placement.

I would want to provide my thoughts about my experience attending a placement training session.

Technical training classes :

- Understanding the concept of java and allowed us to code and see outputs, aiding in practical understanding.
- Trainer gave us many scenario based questions to solve at class.

Daily Communication Classes:

- We were taught simple present and also learnt past and future tense.
- We got opportunities to write a passage using all 4 tenses.
- Trainers also trained us to speak in front of the class with all the tenses used.

Collaborative Learning:

- Presentation hour held regularly.
- Worked in teams of four and each team member presented or taught previously covered topics. Fostered teamwork and reinforced understanding of Java concepts.

Summary

Java sessions provided by our college have been quite useful. The methodical approach and the focus on both technical and communication skills have enabled a well-rounded learning experience. We sincerely appreciate our management efforts on the placement training. Thank you.

(2021 – 2025)

Java Training:

- In Java training, faculty covered the control flow statements, methods and type casting.
- Assignments are provided by the trainer to enhance the coding skills.
- The way he teach us to decode the error in the program is excellent.
- It brings confidence that, anyone can code.

English Class:

- English faculty taught us about the simple present tense and basic grammar.
- He makes us to write about daily routine, so that we will be well trained in present simple tense.
- He breaks the stage fear of very student and makes us to speak.

Presentation:

- It grows confidence significantly.
- It improves the presentation skills and English fluency.

Saturday Class:

- It is quite interesting.
- It makes us to learn about the team coordination, dedication for the team and leadership skill.

Summary

Sincere thanks to our Panimalar management team and training team for the fantastic training sessions. Their commitment and assistance have been incredible, and we sincerely appreciate everything we have learnt from them. We are grateful for their guidance and professional and motivated developing skills.

(2021-202)

I want to share my feedback on attending a JAVA training session conducted by Panimalar Placement training center.

Firstly, the sessions are interesting and informative. It greatly improves my skills in both technical and communication aspects.

My communication class helps us improve our grammar and communication skills. This week we have learned about the present past, present future, past continuous, future continuous, and basics of English. He has given multiple activities based on the topics. He corrected the mistakes that we made.

My Java trainer gives us certain programs as an assignment and solves the same on the next day. These programs help us to build our logical thinking. He also gives us some hints to solve the problems. This week we have completed the arrays concept and object-oriented fundamentals and we have also written some basic programs on our own. He patiently clears all our queries which helps us during our presentations.

The presentations help us in getting rid of stage fear. These session helps us to learn how to explain things and make more clear in those concepts.

I am very thankful to the trainers and management of Panimalar Engineering College for organizing such training programs in our college and we'll use these opportunities fullest to improve our skills and get placed.
